MINI SAFE EVO

MID SAFE EVO

Nova linija LED projektora MINI SAFE i MID SAFE dizajnirana je tako da osigura bezbednost zaposlenih u radnom okruženju, nudeći širok spektar primena zahvaljujući posebnim sistemima sočiva koji na pod projektuju određene oblike u zelenoj, crvenoj, plavoj i žutoj boji. Za razliku od drugih vrsta sistema za obeležavanje, poput lepljivih traka, ovaj sistem je jasno vidljiv čak i u veoma osvetljenim prostorima ili na površinama prekrivenim prašinom i prljavštinom. Predstavlja idealno rešenje, na primer, za označavanje pravaca ka izlazima za slučaj opasnosti (modeli „Mini Safe Arrows” ili „Mid Safe Arrows”). ili bezbedna mesta za prikupljanje i opasna područja (Safe Cross).

o Simbol „figure u hodu” može se koristiti za osvetljavanje pešačke staze, dok simbol „figure u trku” označava izlaz za slučaj opasnosti. Na raspolaganju je mnoštvo standardnih simbola (molimo vas da od kompanije zatražite pregled simbola), a na zahtev se mogu isporučiti i simboli po meri. Svetiljka se sastoji od plastičnog kućišta, aluminijumskog hladnjaka i silikonskih zaptivki koje obezbeđuju stepen zaštite IP54.

The new LED projectors line MINI SAFE and MID SAFE is designed to ensure the safety of employees in work environments through an endless range of applications that can be achieved thanks to special lens systems that projects special shapes on the floor in green, red, blue and yellow color variants.. Compared to any other type of signalling system, such as applying adhesive, this system is clearly visible, even in brightly lighted environments or on surfaces always covered in dust and dirt. It's the ideal product, for example, to report emergency exit directions (Mini Safe Arrows or Mid Safe Arrows) or safe collection points and hazardous areas (Safe Cross). Moreover, with the image of the walking man you can light up a pedestrian path and with the running man you can light up an emergency exit. A lot of standard symbols are available (ask the company for the symbol table) and it's possible, on request, to customize the symbols

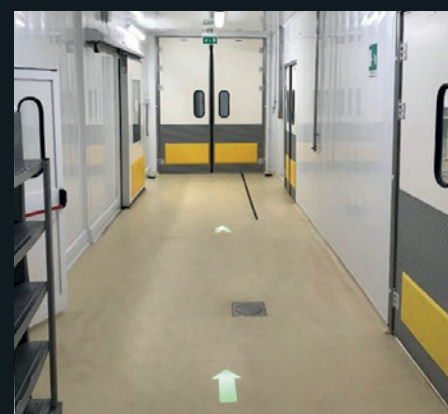

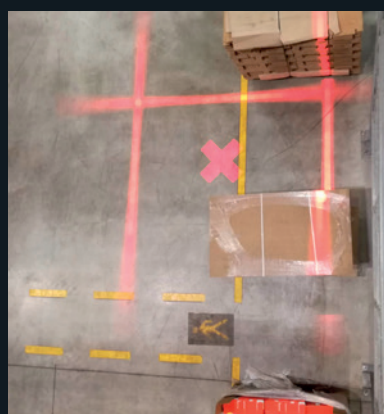

The lamp is made with a plastic structure and an aluminum heatsink completed with silicone gaskets which guarantee the IP54 degree of protection.

Made in Italy

KOD/ CODE	MINI SAFE EVO		MID SAFE EVO		
Boja LED lampe LED COLOUR LAMP	ZELENA - CRVENA - PLAVA- ŽUTA - BELA				
NAPAJANJE / POWER SUPPLY	90-305 Vac / 50-60Hz
