SAFETY BAR 20 EVO

Industrijski LED projektor namenjen bezbednosnom osvetljenju viljuškara. Montira se na vozilo i projektuje snop plave ili crvene svetlosti na udaljenost od nekoliko metara, upozoravajući radnike na približavanje vozila i označavajući zone u kojima se ono kreće i manevriše. Kućište lampe izrađeno je od eloksirano aluminijuma, čelika i najlona ojačanog staklenim vlaknima, što obezbeđuje izdržljivost i visok kvalitet proizvoda. Uređaj ima potrošnju od 20 W (crveno svetlo) ili 24 W (plavo svetlo) i radi na jednosmernom naponu od 12–48 V.

Industrial LED projector designed to ensure the safety lighting on forklifts. This lamp, applied on the forklift, emits a blue or red light beam at a distance of several meters that allows workers to notice the arrival of the vehicle. The lamp can be powered from 12 to 48 Vdc. The materials used, such as anodized aluminium, stainless steel and Nylon loaded with fiberglass make Safety Bar 20 a long lasting and high quality product. The power consumption of this projector is 20W (RED version) or 24W (BLUE version).
